COMBINED HUMIDITY AND TEMPERATURE SENSOR

**DESCRIPTION**
Can provide accurate measurement of both relative humidity and temperature in air conditioned and refrigerated conditions. The sensing element contains a special protective coating for use in polluted environments.

**Features**
- Relative humidity measurement range: 0-100%.
- The temperature measurement is made by the change in resistance on the built-in PTC (Positive Temperature Coefficient) element (KTY81-210).
- High grade sintered stainless steel element acts as a filter against contaminants.

COMBINED CO₂, HUMIDITY AND TEMPERATURE SENSOR

**DESCRIPTION**
A combined sensor designed to measure CO₂ concentration, relative humidity and temperature. Typical applications include occupied spaces such as office buildings, conference rooms and education centres. Measurements can be taken either separately or combined.

**Features**
- Values are shown alternatively on an integrated display.
- Measurement range:
  - CO₂: 0-2000 ppm
  - Humidity: 0-100%
  - Temperature: 0°C to +50 °C
- 24V AC ±20 %
