

DESCRIPTION

The ELDA louvre is designed for external applications.

Its robust yet stylish design makes it suitable for a wide range of commercial applications, including office buildings, restaurants, retail shops and recreation buildings.

The ELDA louvre comes with a galvanised steel spigot that fits inside the wall cavity, leaving the front face to finish flush to the wall.

Its rigidly-fixed horizontal blades are designed to reduce the possibility of rainwater entry.

Features

- Vermin proof mesh is fitted to minimise the entry of debris and birds.
- Front louvre manufactured from durable extruded aluminium with a natural anodised finish.
- Long spigot makes connecting to duct easy.

Testing

Air flow tests based on ISO5801:2007.

SELECTION TABLE

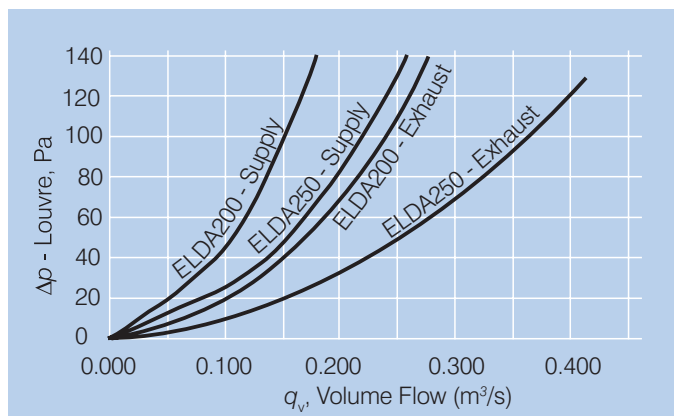

Ring Plate & Vogue Series RP/VCW	Duct mounted fans. Suit duct dia. mm	Louvre Model
202/4	200	ELDA200
252/4	250	ELDA250

The above are only typical selections, as the louvre may be used with other fan types or over openings having dimensions that generally conform to dimensions A and F.

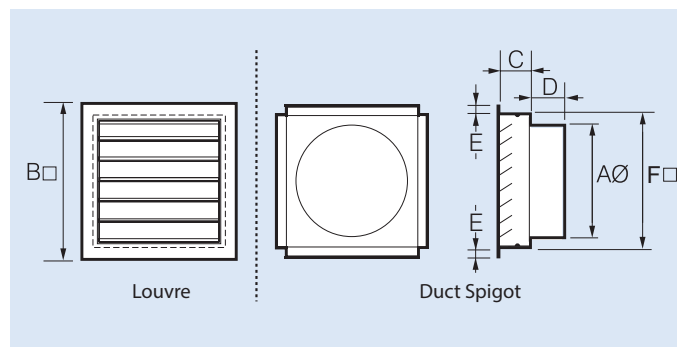

SUGGESTED SPECIFICATIONS

The external louvres shall be of the ELDA series as supplied by Fantech and be of the model number shown on the schedule/drawing. It shall include vermin proof mesh. Its front louvre shall be manufactured from extruded aluminium and its spigot from galvanised steel. The louvre blades shall be of the rigid fixed type.
