

ANCILLARY EQUIPMENT

SUGGESTED SPECIFICATION

The centrifugal extraction fans shall be of the JET Series as supplied by Fantech Pty. Ltd. and be of the model numbers shown on the schedule/drawing.

The housings and impellers shall be made from high density, UV treated polypropylene that is resistance to chemical corrosion. Impellers shall be forward-curved.

The centrifugal extraction fan shall be driven by a direct drive motor and designed to operate with a variable speed controller or variable speed drive

They shall be fitted with inlet spigot and discharge flange, and come standard with a UV treated polypropylene weather cover cone.

Air flow test data shall be based on ISO5801:2017. Noise test data shall be based on ISO 13347.

DESCRIPTION

These roof mounted inline centrifugal fans with vertical discharge are suitable for operation in highly corrosive applications such as laboratory exhaust or the chemical industry. JET fans generate a high plume to ensure maximum dilution of gases in the environment with a motor that is fully enclosed and protected from the corrosive airstream.

There are 3 models in the range to suit duct diameters from 160 to 250mm.

Features

- High density, UV treated polypropylene housing and impeller
- Air flows up to 1000L/s
- 1300 Pa static pressure
- High density, UV treated polypropylene housing and impeller
- Forward curved centrifugal impeller
- Direct drive, asynchronous motor, single or three phase, IP55
- Explosion proof fans available on request
- Recommended up to 60°C

Construction

High density, UV treated polypropylene housing and impeller that are resistance to chemical corrosion.

Internal thermal Protection

Can be provided as an optional extra.

Wiring Diagram

See N-6/7, diagrams DD1,2,3,8

Motors

Type - squirrel cage induction motor
Electricity supply – Motors to suit a wide range of voltages and frequencies can be supplied
Bearings - sealed-for-life, ball
Can be fitted with speed-controller
See pages O-2/3 for details on these motors

Testing

Air flow tests to ISO5801:2017
Noise tests to ISO 13347

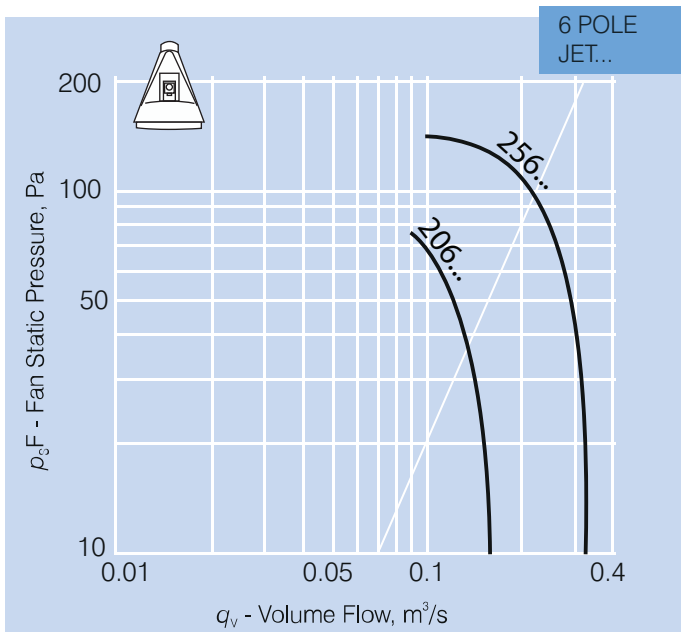

HOW TO ORDER

Jet Series product codes are made up as follows, not all combinations are possible.

Type	Size	Speed	Motor	Power
JET	25	4	B	003

Type	JET Series				
Inlet/Discharge diameter	20 = 160mm 25 = 200mm 30 = 250mm				
Fan Speed, no. of poles	2, 4, 6				
Motor Type	Three Phase B Single Phase S				
Motor Power	001 = 0.18kW 002 = 0.25kW 003 = 0.37kW	005 = 0.55kW 007 = 0.75kW 011 = 1.1kW	015 = 1.5kW 022 = 2.2kW		

DIMENSIONS

Model	Dimensions, mm							
JET...	AØ	B	CØ	DØ	E	F	G	H
20...	600	800	540	160	50	250	160	70
25...	735	900	540	200	60	240	145	25
30...	880	1040	540	250	70	200	75	70
