

# NETA TWIN SERIES

B

## DESCRIPTION

The Neta Twin Series of duct mounted in-line centrifugal fans is complete with a standby fan and motor for applications requiring 100% stand-by capacity.

## Typical Applications

Commercial and industrial supply or exhaust air applications such as shopping centres, office buildings, exhibition centres, hotels, health centres, schools and universities.

## Features

- Robust, yet lightweight galvanised steel construction.
- Easy to fit 35mm TDF profile flange connections.
- Large choice of speeds available.
- Most 3-phase external rotor motors fitted are 2-speed star/delta design.
- To improve energy efficiency, motors can be speed-controlled.
- A range of matched ancillaries is also available.

## Construction

Galvanised sheet steel housing with modern flange connections. Backward-curved centrifugal impellers.

## Motors

Type - external rotor, squirrel cage induction motor.  
Electricity supply - 220-240V, single or 415V, three-phase, 50Hz.  
Bearings - sealed-for-life, ball.  
Speed-controllable using electronic or auto-transformer controllers.  
See pages N-2/3 for details on these motors.

## Internal Thermal Protection

Manual-reset type fitted as standard on all models with standard motors.

## Testing

Air flow test to BS848, Part 1, 1980.  
Noise test to BS848, Part 2, 1985.

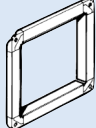

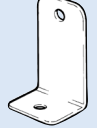

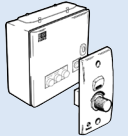

## Special Features

Easy access to the fan and motor is an integral part of the design.  
Most three-phase motors are 2-speed star/delta design.  
Dual fan, dual-motor arrangements give 100% stand-by facility.  
Low-loss non-return damper to prevent short cycling.

## Wiring Diagram

See page M-8, diagram ER 1, 2, 4, 5.

## ANCILLARY EQUIPMENT

 TIL-MF - Matching Flanges, Ref. Section B	 Vibration Isolators Ref. Section I	 FT - Mounting Foot Ref. Section J
 Speed Controllers Ref. Section L		

## DIMENSIONS

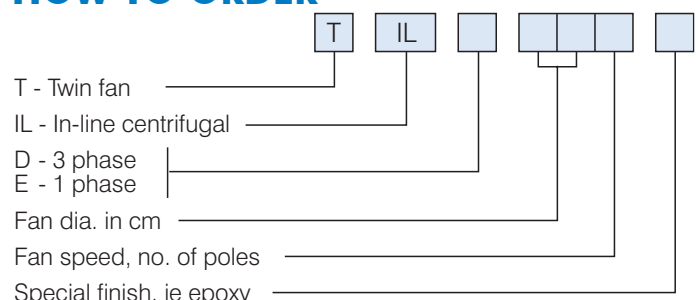

Model	Dimensions, mm				Approx weight kg
TILD..	A	B	C	D	
TILE..					
31.	425	540	780	230	45
35.	500	655	900	280	52
40.	550	745	1015	310	65
45.	625	830	1130	345	88
50.	700	925	1250	390	105
56.	775	1055	1385	405	150

\* Fan must be installed horizontally as shown with non-return damper axis vertical or installed vertically with air flow upwards.

## SUGGESTED SPECIFICATION

Neta Series Twin In-line centrifugal fans shall be as designed and manufactured by Fantech Pty. Ltd.  
Impellers shall be backward-curved centrifugal design and driven by speed-controllable external rotor motors with integral thermal protection.  
The galvanised steel housing shall be designed to optimise the fan performance by having carefully designed intake conditions. The casing and end flanges shall be of a modern formed design.  
All models shall be fully tested to BS848, Part 1, 1980 for air flow and Part 2, 1985 for noise, in a fully certified laboratory.

## HOW TO ORDER

## TECHNICAL DATA

Model	Nom. Speed	Avg. dB(A) @ 3m		TILE.. 1 ph.		TILD.. 3 ph.

508	11	43	45	0.23	1.15	0.30	0.50
564	23	65	65	-	-	<b>2.16</b>	<b>4.10</b>
566	15	54	54	0.84	4.10	<b>0.69</b>	<b>1.45</b>
568	11	44	47	0.32	1.50	0.39	0.79

\* Check fan nameplate for exact amperages.  
 Electrical data in **bold** type refers to fans that are fitted with 2-speed star/delta motors as standard.  
 Note:- The kW and amp figures apply to each motor.

## NOISE DATA
